JUSTIFICATION:

In 2000, the Alaska Board of Fisheries (board) modified sport fishing regulations for lingcod in Southeast Alaska in response to widespread decline in abundance as indicated in the directed lingcod commercial fishery. The board established a guideline harvest level (GHL) approach for sport and commercial fisheries management of lingcod in Southeast Alaska (5 AAC 28.160 (e)). The GHL was allocated between sport and commercial users by the board for seven fishery management areas (5 AAC 28.165). The board also expanded the department's authority to modify regulations to achieve the lingcod allocation for the sport fishery (5 AAC 47.060).

Since 2000 the department has implemented regulations annually by emergency order, including minimum length and slot limits, reduced bag and possession limits, annual limits, nonretention of fish by charter operators and crew members, and reduced seasons. These regulations have been effective at maintaining the sport fishery lingcod harvest near or below allocations in all of the management areas. Sport fishing provisions established by this emergency order for all of the management areas are identical to lingcod regulations implemented by emergency order during 2021.

Residents continue to have no size restrictions or annual limits. These actions are being taken under the authority granted to the department by the board within the *Lingcod delegation of authority and provisions for management* (5 AAC 47.060).

This action is necessary to ensure that sport harvests of lingcod stay within the regulatory harvest allocations to the sport fishery.
