**JUSTIFICATION:**

The 2022 preseason forecast is for a drainagewide run size of 162,000–542,000 chum salmon with a point estimate of 330,000 fish. The 2022 run is anticipated to be below the lower bound of the inriver escapement goal of 500,000–1,200,000. Per 5 AAC 05.362(c) *Yukon River Summer Chum Salmon Management Plan* when the projected run size of summer chum salmon is 650,000 fish or less, the commercial, personal use, and sport fish directed summer chum fisheries will be closed. If inseason stock assessment information indicates that chum salmon escapement goals and subsistence needs in the Yukon River drainage will be met, sport fishing restrictions may be relaxed commensurate with run strength.

**DISTRIBUTION:**

The distribution list for this emergency order is on file at the Region III Office of the Alaska Department of Fish and Game, Division of Sport Fish, 1300 College Road, Fairbanks, AK 99701, (907) 459-7207.
