2022 SOUTHEAST ALASKA HERRING SPAWN-ON-KELP POUND FISHERIES

Section 3-B and District 4 (Craig/Klawock): will open by regulation at 12:00 noon, March 17, 2022, with a minimum guideline harvest level (GHL) of 5,060 tons. This puts the kelp allocation at the maximum allowed per permit.

The 2021/2022 GHL for the Craig/Klawock stock has been set at 12,650 tons of herring. This GHL is based on the 2021/2022 model forecasted mature spawning biomass of 63,250 tons and a harvest rate of 20%. Regulation 5 AAC 27.185(h) states that the winter food and bait fishery is allocated 60% of the GHL and the remaining 40% goes to the herring spawn-on-kelp fishery. The Craig winter food and bait fishery closed by regulation on Monday, February 28, with a confidential harvest. The unharvested portion will be reallocated to the spawn-on-kelp fishery. The initial GHL for the Craig/Klawock spawn-on-kelp pound fishery is 5,060 tons which places the kelp allocation at the maximum level.

The kelp allocation per permit holder in place by regulation 5 AAC 27.185(c) for the 2022 season is as follows:

Single Permit Closed Pound:	600 blades per permit;
Double Permit Closed Pound:	900 blades per permit;
Triple Permit Closed Pound:	1,000 blades per permit;
Quad Permit or more Closed Pound:	1,000 blades per permit;
Single Permit Open Pound:	3,000 blades per permit;
Multiple Permit Open Pound:	9,000 blades per permit.

District 7 (Ernest Sound): **will be closed**. Insufficient herring spawn occurred in the spring of 2021 to generate a forecast. The threshold necessary to conduct a commercial fishery in Ernest Sound is 2,500 tons.

Section 12-A (Tenakee Inlet): **will be closed**. Approximately 1.7 nautical miles of herring spawn was documented in Chatham Strait in the spring of 2021, the department did not conduct a spawn deposition survey, and therefore no forecast was generated. The threshold necessary to conduct a commercial fishery in Tenakee Inlet is 3,000 tons.

Section 13-C (Hoonah Sound): **will be closed**. Insufficient herring spawn occurred in the spring of 2021 to generate a forecast. The threshold necessary to conduct a commercial fishery in Hoonah Sound is 2,000 tons.

All pound operators are reminded that they must have a 2022 Commercial Fisheries Entry Commission Southern Southeast Alaska Spawn on Kelp pound limited entry permit prior to introducing kelp or herring into their pounds. All *Macrocystis* kelp harvesters must have a 2022 permit to harvest *Macrocystis* kelp prior to harvesting kelp for a closed or open pound. These permits must be in the possession of the pound operator and kelp harvester at all times during fishing operations. *Macrocystis* kelp harvest permits are currently available at all Southeast Alaska Department of Fish & Game offices.

Spawn-on-kelp fisherman and processors should read the 2022 SOUTHEAST ALASKA HERRING SPAWN-ON-KELP POUND FISHERY MANAGEMENT PLAN for an overview of the management approach and regulations for the 2022 season. The plan is now available at local ADF&G offices and can be viewed online at:

<http://www.adfg.alaska.gov/FedAidPDFs/RIR.1J.2022.04.pdf>

The 2020–2021 Statewide Commercial Herring Fishing Regulations booklet contains detailed regulations for this fishery. Regulations can be found online at: <https://www.adfg.alaska.gov/index.cfm?adfg=fishregulations.commercial>

Fishery Contacts

For information on management of the Craig/Klawock spawn-on-kelp fishery contact:

Bo Meredith (bo.meredith@alaska.gov), Justin Breese (justin.breese@alaska.gov), or Whitney Crittenden (whitney.crittenden@alaska.gov).
