Fishing time in an area may be extended based on inseason assessment of coded wire tag data and historic harvest timing information. **It is extremely important to segregate fish caught in different fishery areas so that accurate dockside sampling can occur by department personnel.** If salmon are harvested in multiple areas, each troller and tender is required to report these catches on **separate fish tickets** (5 AAC 29.090[k]). The fishery name and the fishery statistical area number must be reported on all fish tickets.
