

Regarding: **KRSA Proposal 190 – Early-run Kenai King Fishery Strategy**

At this time, KRSA withdraws support for this proposal for specific changes to management of early-run Kenai kings during a period of low abundance.

- ✓ This proposal identified a series of management plan measures for stabilizing predictability and scaling opportunity to fish availability.
- ✓ This proposal was, out of necessity, submitted prior to the 2013 fishing season.
- ✓ In light of the very small total run of early-run king salmon observed in 2013 and small runs probable for the next few years, KRSA is hesitant to suggest specific changes to management at this time.
