

Togiak Advisory Committee

**Proposal 221**

**As the proposers of this specific issue we would like to amend the proposal as follows:**

**In the Kulukak Section of the Togiak District tenders, fish processors, and transport vessels must remain as least 1,500 feet away from any set gillnet.**

It should be noted the AC was split in this decision. The discussion was not as thorough as it could have been and the issue was not thoroughly vetted.

Those in favor noted it would open up additional fishing access. Those opposed argued it would not be as safe or convenient for either gear type.

Additional comment can be seen in PC 76 and our AC minutes.
