**Proposal 221 - Opposed**

Mandating tenders, fish processors, and transport vessels in the Togiak District, even the Kulukak Section of the Togiak District only, would be unsafe and add additional cost in gas to travel to deliver. Many fishers operate in 18 ft Lunds, which are flat bottom open skiffs. The further offshore you travel the rougher the water can become, traveling with a load on board and tying off to tenders is difficult as it is. I fish in both the Kulukak and Anchor Pt Sections of the Togiak District.
