

**PROPOSAL 44 – 5 AAC 28.360. Cook Inlet Sablefish Management Plan.** Add a 6-hour prior notice of landing requirement for the Cook Inlet commercial sablefish fishery, as follows:

5 AAC 28.360 is amended by adding a new subsection to read:

**(d) At least six hours before landing sablefish, an operator of a vessel participating in the Cook Inlet sablefish fishery must notify the department by telephone, to a telephone number specified in writing by the department on the registration forms at the time of registration, the following information:**

- (1) vessel name and ADF&G number;**
- (2) date and location of landing, and estimated time of arrival;**
- (3) name of fish buyer or processor;**
- (4) estimated number of pounds of sablefish on board the vessel;**
- (5) whether the catch is dressed fish or whole (in the round) fish.**

**What is the issue you would like the board to address and why?** There is no prior notice of landing (PNOL) regulatory requirement for vessels participating in the Cook Inlet sablefish fishery. Biological sampling of the sablefish and rockfish bycatch harvested during the fishery is coordinated out of Homer and nearly all deliveries occur in Seward. Staff must travel by state vehicle from Homer to Seward in order to meet landings, which takes approximately 4 hours for the drive alone. Offloading happens quickly and the opportunity to sample landings can easily be missed if there is no notification beforehand. Therefore, having a PNOL in place for this fishery would assist in achieving sampling goals, particularly since there has been a decline in effort and harvest in the sablefish fishery in recent years, which has resulted in a protracted season with fewer deliveries during a given time period. Additionally, a PNOL requirement allows Alaska Wildlife Troopers to be notified about upcoming deliveries, providing a coordinated enforcement opportunity. A similar regulation exists for the Prince William Sound (PWS) sablefish fishery as defined under 5 AAC 28.272(e), and landings during the PWS fishery frequently occur in Seward or Whittier and are covered by the same Homer staff as Cook Inlet sablefish landings. Having a PNOL for both fisheries could potentially result in higher productivity and efficiency for the Central Region sampling program because it may allow for more deliveries to be covered during a single sampling trip.

In 2015, a PNOL requirement was implemented as a condition of registration as provided by 5 AAC 28.020. *Groundfish area registration (c)* and a check-out procedure to report landing information was specified on the registration form. Vessels complied reasonably well; however, several waivers of the PNOL requirement were requested. There is overlap of participants between the Cook Inlet and PWS sablefish fisheries and vessels are able to comply with the PNOL requirements for the PWS sablefish fishery. Therefore, it would be expected that vessels would also be able to comply with the same requirement for the Cook Inlet fishery.

**PROPOSED BY:** Alaska Department of Fish and Game (HQ-F16-127)
