195- I believe closing the p/u fishery between 11pm and 6am should continue to be enforced for public safety and maintenance purposes.

196- I strongly disagree with this proposal. It would prohibit nets from being "attached" to vessels. The net is still being operated by hand. Running a line from the net handle to the boat is for safety and does not make it a trawl.

197- I oppose this proposal. It would not be safe to have boats anchored in the river while other boaters/fishermen are attempting to navigate up and down stream. There are also a large number of commercial vessels coming and going, unloading and re-supplying.

198- The net mesh size should remain the same.

199- Limiting the horse power to 10 is unrealistic.

200- Not sure

201- Well defined boundary markers or specific physical descriptions would make compliance easier.

202- Extending the opening would allow more residents the opportunity to participate.

203- Same as 202

204- Extending the upstream boundary would help relieve congestion and improve safety.

205- I believe that if the shore fishery were expanded upstream private property would make enforcement difficult and substantially increase the potential for trespassing, whether intentional or not.

206- Clipping and recording rules should remain the same.

207- Well defined boundary markers or specific physical descriptions would make compliance easier.
