

Committee 6 Proposal 203

Before taking a vote on Proposal 23 — which would grant the Commissioner authority to extend the Kenai River personal use dip net fishery season, and liberalize the personal use bag / seasonal limit, if the department projects the sonar count to exceed 1.2 million Kenai river sockeye salmon—

I would request that the board, consistent with 5 AAC 77.007, record their thoughts on all 7 points of the allocation criteria, AS 16.05.251(e).

As you know this proposal affects 30,000 Alaskan household permit holders, and all other Upper Cook Inlet user groups as well.

Thank You,

Rod Arno, Alaska Outdoor Council
