

Proposal 122. 5 AAC 71.030. Methods, means, and general provisions- Finfish.

This proposal should read as follows:

(d) In the sport, commercial, and subsistence salmon fishery in the Kuskokwim River drainage, inedible salmon parts, shall be discarded midriver away from shore or buried away from any community, or discarded by other locations deemed acceptable by ADFG.

“The purpose of this proposal is to stop people from dumping salmon carcass and salmon parts on beaches. People, especially kids, are getting sick and developing rashes on their skin. People of the Kuskokwim River want this proposal to go through, but with the previous language made it difficult to understand. This clears up the language and I’m sure you will tweak this language to address the main issue: STOP PEOPLE FROM DISCARDING SALMON PARTS ON BEACHES.”
