Board of fish: a Senator,told me , they're are 273000 people on some sort of welfare in Alaska. He also said ,they take home on average 70000 dollars a year. So ,when I was a salt water long liner. I'd go and fish a load of fish, maybe 30000 lbs, at 2.00 a lb back then. About a month later ,I'd get to go again, now to many boats,not to much pressure on the resource! But today,so much fish ,dipnet away to please the poor,sport anglers every where,a lodge advertised to day 50 000 clients . Charter boats ,plumb full clients, my point is ,with all the give away programs ,for the people ,th charter boats and clients. Getting all they can get. All targeted fish at ,25.00 a lb. I just think, the board of fish, has no purpose. You need a plan to get maximum revenue t o the state,for there fish. The answer not who the fish belong to .it revenue, we all ready give every product alaska produces to every person on the planet. We need a good solid market. Board of fish ,is kind of lost it usefulness, it a place where power hungry, association,gets to flex there ,muscle ,and control industry thur conversation. This has to stop, let's re think ,the fishery, we need a revenue source to help pay welfare cost. Dipnet fish five away,just stupid ,salmon 155dollarsca fish. Grow [REDACTED] and let get fish sold over the counter at a descent price.

Board of fish: 16.05.403, age 65 or older, I found this year,65 year old fisherman taking 5kings.and then getting another 65year old proxy,and then he takes another5kings! Then this gentle took another person 65 year old proxy, for a total of 35 kings ,in Anchor point area and kasiolf river drainage,or mouth of the rivers area.

We are trying to protect king salmon , and also the commercial fleet can't catch red salmon,till a certain number of king reach the kill zone for guides. But with proxy,on king salmon,this just make the king run smaller,fish are taken be fore they get in the river,and the commercial fleet can't fish. I ask fish and wildlife to address this problem. They don't monitor,and don't know the rules ,that are in place, no one ever shown the proxy,on any proxy with fish. They don't have a office if law enforcement to go to to show the Kings they catch with proxycards. They know nothing of the rules to the status issued . Please do away with proxy cards,and proxy for king salmon! . Their is no one to enforce the proxy fishery, especially the king fishery! Dipnet fishery,really abused. But king salmon,keep the commercial fishery on the beach
