

RC _____

Submitted by Raechel Allen

This RC is from the KRAA estimated commercial harvest of salmon from KRAA projects and demonstrates that between 2009 and 2018, these projects have generated average of 331,005 sockeye and 4.6 million harvest of pinks. These numbers demonstrate that on average, the KRAA has been able to increase their sockeye harvest ***independent of the sockeye harvested in Cape Igvak***, questioning the need for the Igvak sockeye fishery.

Source: ADF&G fish ticket summaries.

Note: Includes harvest from the Kitoi Bay Hatchery (Izhut Bay, Duck Bay, and Kitoi Bay sections [statistical areas 252-30 to 252-32 and 252-35]). Special harvest area (SHA) harvests are from the returns to the Spiridon Lake project (in the Spiridon SHA, 254-50, and adjacent sections), the Foul Bay SHA (251-41), the Waterfall Bay SHA (251-84), and the Settler Cove SHA (259-35). Includes fish set aside for personal use and cost-recovery harvests.
