

PROPOSAL 10

5 AAC 01.620. Lawful gear and gear specifications; and 5 AAC 77.591. Copper River Personal Use Dip Net Salmon Fishery Management Plan.

Prohibit dipnetting from a boat in the Upper Copper River District, as follows:

Dipnet fishers in the must harvest from shore, from islands in the river, or from stationary objects connected to shore. Dipnet fishing from boats or craft floating in the river is not permitted.

What is the issue you would like the board to address and why? Many Copper Basin residents with intensive local knowledge of salmon ecology have raised concerns about the health of Copper River salmon stocks. The Gulkana Hatchery has not had enough brood-stock to meet its egg-take goals since 2014. Although overall escapement levels have been reasonable in the Copper drainage, very little tributary-by-tributary data are collected. Smaller stocks can easily be damaged by overharvest. Dipnetting from boats in the subsistence fishery raises some particular concerns. Wild salmon stocks tend to hole up in deep areas and rest on their way up the river, especially during high water. Fishermen who fish from boats are able to target salmon that are concentrated in these areas. The increased popularity of dipnetting from boats since 2010, combined with the high numbers of fish that each subsistence dipnetter can harvest, could be contributing to the depletion of some smaller stocks.
