

Miles the Moose reminds you to help look for moose when riding in the car. If you see one, tell the driver to slow down and use hazard lights to warn others.

Hi Kids! I'm Miles the Moose.

Share these driving tips with adults and help look for wildlife!

- 1 Slow down at night and in bad weather when it is hard to see.
- 2 Look out for moose and other wildlife on both sides of the car.
- 3 Keep plenty of room between your car and others on the road.
- 4 Clean all the windows and headlights to make it easier to see the road.
- 5 If you see one moose, there may be more! Moose moms often have young nearby.
- 6 Know where moose are often seen in your neighborhood and look for moose-crossing signs.
- 7 If you see wildlife, warn other drivers:

“Give your hazards a flash to avoid a crash!”
